

Code Smells In SharingApp

Excessive Use of Comments

- Location → SaveContacts method of EditContactActivity.
- Type → Excessive use of comments
- Description → I think it is the use of excessment comments. Because the variable and function names are considered to be inadequate inadequate. In this case, it is again a different bad stinking code. This is that the function and variable names are bad.
- Reason → The reason why it is necessary to correct is that the code appears to be complicated. Excessive use shows the comments complex. So it needs to be replaced.
- Solution → To ensure that the variable and function names are corrected and the comments is not required.

Duplicated Code

- Location → saveItems and loadItems methods of ItemList and saveContacts and loadItems methods of Contact List
- Type → Duplicated Code
- Description → The above methods have the same methods except one variable.
- Reason → The code can cause repetition and can grow the project.
- Solution → Create FileManage Class and give item or contact as parameter to methods.
